Kiha Skirt Usage Guide

These instructions are a guide only but changing the Couplers is not recommended.

Skirt Type A

Item: K40-008

Skirt Type A comes with a hole for a coupler.

Item: K47-009

Optional coupler (Type B) is used when 3 or more carriages are to be connected.

Front & rear carriages should use Skirt A. Couplers in the middle carriage should be changed to Type B. It is not suggested in KIHA 40 to make such a change, because it becomes difficult to assemble LEDs inside the body on both sides. This may also damage the insulating LED sponge.

Above: A close up view of joined Kiha Cars showing use of Skirt, with an opening for the coupler.
